

Mind the wide
bandgap!

SummerSchool 2021 (online event)

New semiconductor technologies – 23 August - 27 August

Where? Online event live from Infineon Technologies Austria AG – Villach, Carinthia (Austria)

What?

- › Get unparalleled insights into the world of Silicon and wide bandgap technologies at Infineon – focusing on Silicon (Si), Silicon Carbide (SiC) and Gallium Nitride (GaN), especially linking these topics to 5G applications
- › Participate in lectures with top experts from Infineon and world-class professors
- › Link the technical knowledge to sustainability aspects in discussions about responsible research and innovation
- › Boost your career: Network and find topics for BSc-, MSc- and PhD-theses, internships or even a job for after you graduate
- › Pitch your research topic to peers, industry experts and professors

Who?

- › BSc, MSc and PhD students enrolled at an European university within the field of physics, material science, (power)electronics, AI on the edge, embedded AI, electrical engineering, mechanical engineering, chemistry or similar

Highlights?

- › World-class speakers, networking between students and Infineon experts, PhD pitches, social activities

Application deadline: 07 July 2021 (Attention: limited number of participants)
