

Senior Java EE Developer

in Belgrade office • valid until July 05

Your daily work involves tasks which are usually related to the following technologies and tools:

- Development of complex server application components on Java EE platform, using various libraries (Spring, Hibernate, Spring MVC, Apache Wicket, etc.)
- Development of web-based user interfaces (Javascript, incl. AJAX libraries, XHTML, CSS)
- Making design decisions and participating in the design of the complete system
- Data operations in relational databases (SQL, PL/SQL)
- Writing and maintenance of build scripts (Maven , Ant)
- Writing automated tests

What type of people work in our teams and what we expect from you also:

- Knowledge of Java technologies and experience in Java development for at least 3 years in real customer projects
- Team work and communication skills – this means if there is something you don't understand, you ask. If something does not seem reasonable, you say so.
- Ability to produce quality deliverables and you are proud of the code you commit to the repository.
- Initiative and orientation to results – this means if you see something that needs fixing, you either fix it or inform others of a potential problem source. If you are asked to do something that doesn't seem to be in accordance with the client's requirements, you make it known.

Useful Skills

- If you have experience with Oracle or IBM products like Java application servers or relational databases
- If you have experience with SOA solutions (web services, portals, ESB, BPMN, etc.)
- If your knowledge of English pretty much equals that of your native language.

We Offer

- Interesting projects with various clients – largest telecommunication, finance, healthcare, public sector companies – developing big systems from scratch in professional teams
- Ability to work with latest technologies and tools:
 - Work with the latest technologies and frameworks
 - Process where role of analyst is separated and the user interface is created during the analysis phase
 - Opportunities to offer technical solutions, to participate in the preparation of architecture of systems
- Youthful and passionate team
- Motivational salary depending on experience and work result
