

internships at aggios™

... unified at the core

about us

aggios is a young serbian-american technology company developing operating systems software for smartphones and other electronic devices with stringent energy requirements. our innovative software complements standard Linux and Android operating systems to improve power, security and thermal characteristics of modern multicore architectures. aggios was founded by a team of former technology executives of ARM and Qualcomm with support from a group of Berkeley and Princeton University professors.

about the internship program

aggios Belgrade is offering 4-6 month internships in the areas of power management firmware development, and operating system software development. chosen candidates will be working with cutting edge embedded systems, such as the latest smartphone platforms like TI OMAP and Nvidia Tegra or next generation home gateway platforms from Mindspeed™ Technologies and others. after successful completion of the internship program candidates have excellent chances to be offered a full time position at aggios Belgrade.

about you

in order to be considered for our internship program you must meet the following minimum qualifications:

- final year of bachelors degree or in masters program of electrical engineering or computer science
- good C-programming skills
- english language proficiency

please email your CV to jobs@aggios.com
