

Software Engineer

Responsibilities

We are currently looking for highly motivated Software Engineers to join our newly founded Belgrade office. Successful candidates will be working with some of the most technically gifted people in our industry and will benefit from on-going training (approx. 10% of your time), achievement based career prospects, a competitive salary and additional benefits.

You will have an analytical, yet innovative mindset and the desire to challenge conventional thinking. You have practical experience with many of the following technologies: Java, J2EE, C#, .NET, Dynamic languages (JavaScript, ActionScript, Python or Ruby), Service Oriented Architectures, Message Queues, EAI tools, Agile techniques, UML, ORM tools, RDBMS, Rich Internet Application Technology (Flex, GWT or Silverlight) and Client Technology (Eclipse RCP, Swing or Windows Presentation Foundation).

Projects are typically based in our office in Novi Belgrade but there may be opportunities for working temporarily at other Zühlke locations abroad. You must have a modern international outlook and be able to collaborate effectively with colleagues and clients across the Zühlke group.

Qualifications

Good computing related degree and/or equivalent professional qualification. Communicative and open-minded personality, fluent in English (both written and oral), German language skills are valuable but not essential.
