

Veriest Venture is a leading design house providing Design and Verification solutions for the chip development and electronic systems industry in the world. Our clients are startup companies as well as enterprises such as Cisco, SanDisk, Intel, Synopsys, and more.

Veriest is located in Tel Aviv & New Belgrade. We have 60 engineers on board and growing rapidly.

The rapid development in the semiconductor industry has brought with it a great demand for tools development that will enable engineers to develop large systems quickly and efficiently. Such software development requires a thorough understanding of digital and analogues electronic circuits. During the past year the company started developing a software tool that will pioneer the next generation of software products for verification of ASIC & FPGA.

Our success is based upon the unique talents and professionalism of our team members. If you are looking for an environment where you can cultivate your expertise, gain exposure to leading edge technology and work among friends - Veriest Venture is your place.

## **Come join us at Veriest Venture!**

### **We are looking for:**

#### **C++ Developer**

For our Belgrade development center, we are seeking highly motivated and skilled C++ developer to be involved in building modeling software for challenging IPs development.

#### **Requirements:**

- ✓ University Degree in electronics / computer engineering / computer science
- ✓ 3+ years of experience in C++ - must
- ✓ Experience in working in SW departments of Hardware / Semiconductors companies - Advantage
- ✓ Ability to read and interpret hardware specifications
- ✓ Experience in development under Linux and Windows (Visual Studio)
- ✓ Creative and Service provider abilities
- ✓ Fast learning of new areas and issues
- ✓ Fluent in English, both spoken and written
- ✓ Team player
