JOIN EVOLVEA INTERNSHIP PROGRAM AND WE'LL GIVE YOUR CAREER A RAPID GROWTH!

Why join us?

We will help you to build up and develop your professional career and become an important actor of our e-business.

Evolvea Internship program runs two times per year and is structured in 3-4 months periods. Our aim is to develop your knowledge and proficiency in the various fields of Software Engineering with the emphasis on Open Source and E-Business solutions, which are the core determinants of the program.

Interested candidates will have the opportunity to join a very motivated team of IT experts willing to help and share its knowledge and experience. In addition, the opportunity to become an important actor of our e-business will be offered to most prominent interns.

Who we are?

Evolvea is an integral part of a renowned international IT corporation, which employs over 200 people that come from different educational backgrounds and have diverse experiences and versatile technical knowledge. One of us will be appointed as your mentor, dedicated to provide adequate support and share knowledge with you. Our goal is to discover your hidden potential, help you to build up your skills and boost your career.

What we offer?

We offer monthly internship salaries as well as an opportunity to obtain performance based bonuses. As interns you will be tutored how to tackle actual job tasks and project assignments, important for the success of our operations.

Interested candidates should send their CV's to *info@evolvea.rs* by 15th of October 2014.

EVOLVEA: J2EE Alfresco Developer Pathway

This practical pathway is designed to introduce first time Alfresco users who will be involved with an Alfresco project and want to continue a learning pathway to becoming an Alfresco developer or expert.

This self-paced practical course is designed to introduce you to the technology of Alfresco Enterprise Content Management. Through a combination of self-paced learning sessions, demonstrations, customization company solutions and exercises you can begin to familiarize yourself with Alfresco technology, and gain an insight into its architecture and deployment options.

Pre-Requisites

The pathway can be taken without any previous Alfresco experience and does not require any other courses as a pre-requisite. It acts as a necessary to understand Alfresco environment and its architecture.

It is a requirement that you understand XML and are able to edit XML files for configuration of the system. You should be familiar with basic system administration of an operating system such as Linux or Windows and have:

- some experience in the development of J2EE applications,
- using the Eclipse development tools
- knowledge of some Spring framework, Struts, language, Javascript, CSS.
- knowledge of SQL language

Pathway Objectives

The pathway will allow participants to understand what it is possible to do with the Alfresco system and to make appropriate and informed decisions about when and how to deploy the technology.

In order for participants to understand how development is carried out we also look at the alternative options of configuring, customizing and developing with Alfresco.

At the end of this pathway you should be able to:
- Understand the components of an Alfresco ECM system and their interactions
- Create and manipulate content in the repository
- Understand how Alfresco manages content and metadata
- Understand the Alfresco content model
- Create custom object types and aspects
- Describe the Alfresco security model
- Configure users, groups, and roles
- Understand repository configuration
- Compiling and delivery Alfresco application on most important application servers
