

Senior Back End Developer

Aspire Technology is an innovative Irish R&D and Professional Services company, with a core competence in Mobile Telecommunications. Our customers include Tier-1 mobile operators and the world's leading suppliers of telecommunications products and services. Due to an increase in business, we are actively recruiting experienced developer for our product development team in Belgrade, Aspire Technology Limited Branch Belgrade.

The product will be implemented in corporation with a partner company **Endeavour Technology**, headquartered in Dublin, Ireland. Endeavour Technology is a product development company that creates innovative cloud based solutions for Mobile Carriers. The flagship solution (nSpire platform) is a composition of cloud based OSS applications which is complemented with a mobile device self care apps.

The OSS applications utilise mobile device experience indicators such as Quality of Experience, Quality of Service and Quality of Network.

nSpire is a SaaS Cloud based solution where data is collected from each mobile device and stored in the cloud. Applications then sit on top of the data. Significant volumes of real-time data will be captured and stored.

This is an early stage project so it is exciting opportunity for Developers to significantly influence the product design and product strategy.
