

Full Stack Developer

Full Time

At Log-hub, we build advanced Supply Chain Analytics solutions for our customers. We help them to get visibility and make smart data driven decisions. We develop our tailor made solutions based on the latest technologies.

As a key member of the team, you will develop new methodologies and functionalities for our platform. You will get direct feedback from our customers that will inspire you to improve our products every day. Log-hub is an engineering startup that builds its solutions on the newest technologies. We hire people with a broad set of technical skills who are ready not only to identify the problem, but to also figure out the solution.

Responsibilities

- Build next-generation web applications on the client and server side using Angular and Node.js
- Focus on high-end performance web UIs
- Redesign UIs, implement new UIs or UI features and make our customers happy
- Write server-side code, create robust high-volume production applications
- Have fun at work!!!

Qualifications

- Studies in Computer Science or related technical field or equivalent practical experience
- Work experience in agile software development is an advantage
- Experience with one or more general purpose programming languages including, but not limited to NodeJS and JavaScript
- Experience with Express, MongoDB and Redis
- Development experience in Angular
- Experience in Microsoft Office (especially Excel)
- Strong Verbal and Written Communication Skills in English
- Friendly and professional demeanor
- Team working capability

What we offer

- Full time employment
- Chance to write your thesis with the company
- Working in a diverse and international environment
- Being part of team full of young and talented people
- Combination of office and homeoffice work
